

# ICEsonic HP 200

The HP 200 dry ice dosing machine is the perfect solution for dosing dry ice pellets into a dry ice blasting machine when needed. With a massive capacity of 200kg, the HP 200 can handle large-scale production needs with ease, providing a reliable and efficient solution for businesses that demand the highest level of precision and performance. Built with top-quality materials, the HP 200 is designed to withstand the rigours of continuous use, ensuring long-lasting performance and minimal maintenance. Featuring a Siemens HMI, it has intuitive controls and user-friendly interface to make operation simple and straightforward. Its compact design allows for easy installation and integration into your existing production processes. With its impressive capacity and reliable performance, the HP 200 can ensure that your dry ice blasting machine is always supplied with the precise amount of dry ice it needs to get the job done quickly and efficiently.
